

Class 10 — Exam-Wise Practice Questions

Physics · Chemistry · Botany · Biology · English · Telugu | Chapters 1, 2 & 3

PHYSICS

Chapter 1: Light — Reflection and Refraction

MCQs (1 mark)

1. The image formed by a plane mirror is:
(a) real and inverted
(b) virtual and erect
(c) real and erect
(d) virtual and inverted
2. Focal length of a concave mirror is taken as:
(a) positive
(b) negative
(c) zero
(d) infinity
3. Refractive index of medium 2 with respect to medium 1 is:
(a) v_1/v_2
(b) n_1/n_2
(c) n_2/n_1
(d) c/v
4. A ray of light passes from air to glass. It bends:
(a) towards normal
(b) away from normal
(c) no bending
(d) parallel to normal
5. Magnification $m = +1$ for a mirror/image means image is:
(a) diminished
(b) same size, virtual
(c) enlarged, real
(d) at focus

VSA (1 mark)

6. State the laws of reflection of light.
7. Define refractive index.
8. Write mirror formula.
9. What is the power of a lens of focal length 0.5 m?
10. Define principal focus of a concave mirror.

SA (2 marks)

11. An object is placed 20 cm in front of a concave mirror of focal length 10 cm. Find image distance and nature of image.

12. Light enters from water to air. If angle of incidence in water is 45° and critical angle is 48° , will total internal reflection occur? Why?
13. Draw ray diagram for image formation when object is at C for concave mirror.

LA (3–4 marks)

14. **[3]** A convex lens of focal length 20 cm forms a real image at 60 cm. Find object distance and magnification.
15. **[4 — Case Study]**

A student uses a concave mirror and finds image at 30 cm when object is at 30 cm.

(i) Where is the object placed? **[1]** (ii) Size of image compared to object? **[1]** (iii) Draw labelled ray diagram. **[2]**

Chapter 2: Human Eye and Colourful World

MCQs (1 mark)

- Least distance of distinct vision for young adult is:
 - 25 cm
 - 2.5 cm
 - 250 cm
 - infinity
- Myopia is corrected using:
 - convex lens
 - concave lens
 - bifocal lens
 - cylindrical lens
- Red colour is used in danger signals because:
 - scattered most
 - least scattered
 - absorbed most
 - refracted most
- Power of normal eye lens is about:
 - +20 D
 - 20 D
 - +2 D
 - 0 D
- Twinkling of stars is due to:
 - reflection
 - atmospheric refraction
 - dispersion
 - diffraction

VSA (1 mark)

- Name the defect when eye lens becomes cloudy.
- What is presbyopia?
- Why does sky appear blue?
- Define power of accommodation.
- What is dispersion of light?

SA (2 marks)

11. Explain why hypermetropia occurs and how it is corrected.
12. Why do we see rainbow after rain?
13. Draw a labelled diagram of human eye.

LA (3–4 marks)

14. **[3]** A person cannot see objects beyond 1.2 m clearly. Find focal length and power of corrective lens.
15. **[4]** Explain refraction of light through a prism with diagram. Why is violet deviated more than red?

Chapter 3: Electricity

MCQs (1 mark)

1. SI unit of electric current is:
 - (a) volt
 - (b) ampere
 - (c) ohm
 - (d) watt
2. 1 kWh equals:
 - (a) 3.6×10^6 J
 - (b) 360 J
 - (c) 36 J
 - (d) 3.6 J
3. In series combination, total resistance:
 - (a) decreases
 - (b) increases
 - (c) unchanged
 - (d) zero
4. Heating effect of current is used in:
 - (a) motor
 - (b) generator
 - (c) electric iron
 - (d) dynamo
5. If $V = 220$ V and $R = 44 \Omega$, current is:
 - (a) 5 A
 - (b) 0.2 A
 - (c) 10 A
 - (d) 44 A

VSA (1 mark)

6. State Ohm's law.
7. Define 1 volt.
8. Write formula for electric power.
9. What is resistivity? Give SI unit.
10. Define electric circuit.

SA (2 marks)

11. Three resistors 2Ω , 3Ω , 6Ω are in parallel. Find equivalent resistance.
12. Find heat produced in 10Ω resistor in 2 s when 5 A flows through it.
13. Draw circuit diagram for ohmmeter/verification of Ohm's law experiment.

LA (3–4 marks)

14. **[4]** An electric heater rated 1000 W, 220 V is used 2 hours daily for 30 days. Find energy consumed in kWh and cost at ₹5 per unit.
15. **[3 — Case Study]**

House has 4 bulbs (100 W each) used 5 h/day and 1 fan (75 W) used 10 h/day for 30 days at ₹6/unit.

(i) Total energy in kWh. **[2]** (ii) Total bill. **[1]**

CHEMISTRY

Chapter 1: Chemical Reactions and Equations

MCQs (1 mark)

1. Rusting of iron is:
(a) reduction
(b) oxidation
(c) displacement
(d) double displacement
2. Balanced equation for $\text{H}_2 + \text{O}_2 \rightarrow \text{H}_2\text{O}$ has coefficients:
(a) 1,1,1
(b) 2,1,2
(c) 2,2,2
(d) 1,2,1
3. In reaction $\text{Zn} + \text{CuSO}_4 \rightarrow \text{ZnSO}_4 + \text{Cu}$, Zn is:
(a) oxidised
(b) reduced
(c) catalyst
(d) inactive
4. Photochemical reaction example:
(a) rusting
(b) photosynthesis
(c) burning coal
(d) digestion
5. Quick lime reacts with water — reaction is:
(a) endothermic
(b) exothermic
(c) neutralisation
(d) decomposition

VSA (1 mark)

6. What is a combination reaction? Give one example.
7. Define oxidation in terms of oxygen/hydrogen/electrons.
8. Write balanced equation for decomposition of calcium carbonate on heating.
9. What is corrosion?
10. State law of conservation of mass in chemical reactions.

SA (2 marks)

11. Balance: $\text{Fe} + \text{H}_2\text{O} \rightarrow \text{Fe}_3\text{O}_4 + \text{H}_2$
12. Write difference between displacement and double displacement reactions with examples.
13. Explain rancidity and methods to prevent it.

LA (3–4 marks)

14. **[3]** Write balanced chemical equations: (i) Magnesium burns in air (ii) Zinc with dil. HCl (iii) Silver nitrate with copper

15. **[4]** Describe activity series experiment with iron, copper, zinc and aluminium sulphate/copper sulphate solutions. Write observations and conclusions.

Chapter 2: Acids, Bases and Salts

MCQs (1 mark)

1. pH of pure water at 25°C is:
(a) 0
(b) 7
(c) 14
(d) 1
2. Acid + Base →:
(a) salt + hydrogen
(b) salt + water
(c) oxide + water
(d) metal + gas
3. Baking soda chemical name:
(a) Na_2CO_3
(b) NaHCO_3
(c) CaCO_3
(d) NaCl
4. Litmus turns red in:
(a) acid
(b) base
(c) salt
(d) water
5. Plaster of Paris is:
(a) $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$
(b) $\text{CaSO}_4 \cdot \frac{1}{2}\text{H}_2\text{O}$
(c) $\text{Ca}(\text{OH})_2$
(d) CaCl_2

VSA (1 mark)

6. What is acid rain? How is pH related to H^+ ion concentration?
7. Why does dry HCl gas not change dry litmus colour?
8. Write formula of gypsum.
9. Name the acid present in vinegar.
10. What are alkalis?

SA (2 marks)

11. Explain how antacids provide relief from acidity.
12. Write preparation and uses of washing soda.
13. Differentiate between strong and weak acids with examples.

LA (3–4 marks)

14. **[4]** Explain pH scale with diagram. Why is pH maintenance important for living organisms?
15. **[3 — Case Study]**

Farmer finds soil pH = 4.5. Crop needs pH 6–7.

(i) Is soil acidic or basic? **[1]** (ii) What should be added? **[1]** (iii) Write neutralisation equation. **[1]**

Chapter 3: Metals and Non-metals

MCQs (1 mark)

- Most reactive metal among Na, Fe, Cu, Au:
 - Na
 - Fe
 - Cu
 - Au
- Non-metal essential for respiration:
 - nitrogen
 - oxygen
 - chlorine
 - hydrogen
- Aluminium oxide layer prevents:
 - melting
 - further corrosion
 - conduction
 - malleability
- Ionic bond formed between:
 - two metals
 - metal and non-metal
 - two non-metals
 - noble gases
- Galvanisation coats iron with:
 - copper
 - zinc
 - tin
 - silver

VSA (1 mark)

- Why is aluminium used for food packaging?
- Define alloy with one example.
- What happens when sulphur reacts with oxygen?
- Why are ionic compounds solid at room temperature?
- Name two noble metals.

SA (2 marks)

- Explain why sodium stored in kerosene but phosphorus in water.
- Compare properties of ionic and covalent compounds.
- Write reaction of iron with steam.

LA (3–4 marks)

- [4]** Explain extraction of metals based on reactivity series with electrolytic reduction and carbon reduction examples.
- [3]** Draw electron dot structure of NaCl and explain ionic bond formation.

Chapter 1: Life Processes — Nutrition in Plants

MCQs (1 mark)

1. Site of photosynthesis in plant cell:
(a) mitochondria
(b) chloroplast
(c) nucleus
(d) ribosome
2. Stomata are present mainly on:
(a) roots
(b) stem
(c) leaves
(d) flowers
3. Parasitic nutrition seen in:
(a) mango
(b) Cuscuta
(c) algae
(d) wheat
4. Raw materials for photosynthesis:
(a) CO_2 and O_2
(b) CO_2 and H_2O
(c) O_2 and H_2O
(d) N_2 and CO_2
5. Guard cells control:
(a) transpiration only
(b) opening/closing of stomata
(c) root growth
(d) pollination

VSA (1 mark)

6. Write balanced equation for photosynthesis.
7. What is autotrophic nutrition?
8. Name pigment responsible for capturing light.
9. Define saprotrophic nutrition with example.
10. What are insectivorous plants?

SA (2 marks)

11. Describe structure and function of stomata with diagram.
12. How do fungi obtain nutrition?
13. Why are leaves generally broad and green?

LA (3–4 marks)

14. **[4]** Explain photosynthesis with diagram. List conditions and products.
15. **[3 — Case Study]**

Plant kept in dark for 48 h, then iodine test on leaf.

(i) Why kept in dark first? **[1]** (ii) Expected colour change? **[1]** (iii) Conclusion? **[1]**

Chapter 2: Transport in Plants

MCQs (1 mark)

1. Water transport in plants through:
 - (a) phloem
 - (b) xylem
 - (c) cambium
 - (d) epidermis
2. Translocation of food occurs in:
 - (a) xylem
 - (b) phloem
 - (c) root hair
 - (d) stomata
3. Root pressure helps in:
 - (a) ascent of sap
 - (b) photosynthesis
 - (c) reproduction
 - (d) respiration
4. Loss of water vapour from aerial parts is:
 - (a) respiration
 - (b) transpiration
 - (c) guttation
 - (d) osmosis
5. Ringing experiment demonstrates role of:
 - (a) xylem
 - (b) phloem
 - (c) cortex
 - (d) pith

VSA (1 mark)

6. Define transpiration.
7. What is osmosis?
8. Name tissue that transports sugars.
9. What is turgor pressure?
10. Why do plants wilt in hot dry weather?

SA (2 marks)

11. Differentiate xylem and phloem.
12. Explain how root hairs help in absorption of water.
13. What is transpiration pull?

LA (3–4 marks)

14. **[4]** Describe mechanism of water absorption and transport in plants with labelled diagram.
15. **[3]** Explain importance of transpiration for plants.

Chapter 3: Reproduction in Plants

MCQs (1 mark)

1. Fusion of male and female gametes is:
 - (a) pollination
 - (b) fertilisation
 - (c) germination
 - (d) fragmentation
2. Vegetative propagation in Bryophyllum by:
 - (a) stem
 - (b) leaf buds
 - (c) roots
 - (d) seeds
3. Pollination by wind — flower usually has:
 - (a) colourful petals
 - (b) large sticky pollen
 - (c) feathery stigma
 - (d) strong scent
4. Part of flower that develops into fruit:
 - (a) ovary
 - (b) ovule
 - (c) stigma
 - (d) anther
5. Binary fission seen in:
 - (a) rose
 - (b) Spirogyra
 - (c) potato
 - (d) mango

VSA (1 mark)

6. Define pollination.
7. What is a bisexual flower?
8. Name agents of pollination.
9. What develops from ovule after fertilisation?
10. Give one advantage of vegetative propagation.

SA (2 marks)

11. Differentiate self and cross pollination.
12. Label diagram of longitudinal section of flower.
13. Explain seed dispersal by wind with example.

LA (3–4 marks)

14. **[4]** Describe sexual reproduction in flowering plants from pollination to seed formation.
15. **[3]** Explain vegetative propagation with three examples and benefits in agriculture.

BIOLOGY (Human & Animal Science)

Chapter 1: Life Processes — Nutrition & Respiration in Animals

MCQs (1 mark)

1. Final product of anaerobic respiration in muscles:
 - (a) $\text{CO}_2 + \text{H}_2\text{O}$
 - (b) lactic acid
 - (c) alcohol + CO_2
 - (d) oxygen
2. Site of complete digestion and absorption:
 - (a) stomach
 - (b) small intestine
 - (c) large intestine
 - (d) oesophagus
3. Enzyme in saliva:
 - (a) pepsin
 - (b) amylase
 - (c) lipase
 - (d) trypsin
4. Exchange of gases in alveoli occurs by:
 - (a) osmosis
 - (b) diffusion
 - (c) active transport
 - (d) pumping
5. Raw material for aerobic respiration:
 - (a) glucose + O_2
 - (b) $\text{CO}_2 + \text{H}_2\text{O}$
 - (c) protein
 - (d) fat only

VSA (1 mark)

6. Write equation for aerobic respiration.
7. What is peristalsis?
8. Name the pigment in RBC that carries oxygen.
9. Define assimilation.
10. What is egestion?

SA (2 marks)

11. Explain nutrition in Amoeba with diagram.
12. Why is diaphragm important in breathing?
13. Differentiate inhalation and exhalation.

LA (3–4 marks)

14. **[4]** Describe human digestive system with enzymes and their functions.
15. **[3]** Explain mechanism of breathing with labelled diagram of human respiratory system.

Chapter 2: Control and Coordination

MCQs (1 mark)

1. Functional unit of nervous system:
 - (a) nephron
 - (b) neuron
 - (c) alveoli
 - (d) villi
2. Master gland of body:
 - (a) thyroid
 - (b) pituitary
 - (c) adrenal
 - (d) pancreas
3. Reflex action controlled by:
 - (a) brain only
 - (b) spinal cord
 - (c) heart
 - (d) stomach
4. Plant hormone for cell elongation:
 - (a) auxin
 - (b) adrenaline
 - (c) insulin
 - (d) oestrogen
5. Deficiency of iodine causes:
 - (a) diabetes
 - (b) goitre
 - (c) rickets
 - (d) scurvy

VSA (1 mark)

6. What is a reflex arc?
7. Name hormone that regulates blood sugar.
8. Define tropic movement in plants.
9. What is synapse?
10. Name gland that secretes adrenaline.

SA (2 marks)

11. Explain phototropism with experiment.
12. Differentiate nervous and hormonal control.
13. Draw structure of neuron and label parts.

LA (3–4 marks)

14. **[4]** Explain human brain parts and their functions with diagram.
15. **[3 — Case Study]**

Diabetic patient has high blood glucose.

- (i) Which hormone is deficient/excess? **[1]** (ii) Which gland? **[1]** (iii) One symptom and treatment. **[1]**

Chapter 3: How do Organisms Reproduce?

MCQs (1 mark)

1. Binary fission in bacteria is:
 - (a) sexual
 - (b) asexual
 - (c) vegetative
 - (d) budding
2. Female reproductive part of flower:
 - (a) stamen
 - (b) pistil
 - (c) petal
 - (d) sepal
3. Contraceptive pill prevents:
 - (a) fertilisation/ovulation
 - (b) pollination
 - (c) germination
 - (d) respiration
4. Regeneration seen in:
 - (a) Amoeba
 - (b) Planaria
 - (c) yeast
 - (d) potato
5. DNA copying needs:
 - (a) high error rate
 - (b) cellular apparatus
 - (c) no energy
 - (d) only RNA

VSA (1 mark)

6. Define reproduction.
7. What is budding? Give example.
8. Name male reproductive cells in humans.
9. What is menstruation?
10. Define variation.

SA (2 marks)

11. Differentiate asexual and sexual reproduction.
12. Explain spore formation in *Rhizopus* with diagram.
13. List two methods of family planning.

LA (3–4 marks)

14. **[4]** Describe male and female reproductive systems in humans with labelled diagrams.
15. **[3]** Why is DNA copying essential during reproduction? What happens if errors occur?

Chapter 1: A Letter to God — G.L. Fuentes

MCQs (1 mark)

1. Lencho wrote letter to:
 - (a) postmaster
 - (b) God
 - (c) farmer friend
 - (d) bank manager
2. Lencho's crop was destroyed by:
 - (a) drought
 - (b) hailstorm
 - (c) flood
 - (d) insects
3. Postmaster was impressed by Lencho's:
 - (a) wealth
 - (b) faith in God
 - (c) anger
 - (d) education
4. Lencho called post office employees:
 - (a) angels
 - (b) bunch of crooks
 - (c) friends
 - (d) saints
5. Story theme centres on:
 - (a) greed
 - (b) faith and irony
 - (c) war
 - (d) science

VSA (1 mark)

6. Who was Lencho? What did he do for living?
7. How much money did Lencho ask from God?
8. Why did postmaster help Lencho?
9. What is irony in the end of story?
10. Find synonym of 'conscience' from lesson.

SA (2 marks)

11. Describe the destruction caused by hailstorm on Lencho's field.
12. How did postmaster and employees collect money for Lencho?
13. Was Lencho ungrateful or naive? Justify.

LA (3–4 marks)

14. **[4]** "Faith can move mountains." Discuss Lencho's faith with reference to the story.
15. **[3]** Write character sketch of Lencho and the postmaster.

Chapter 2: Nelson Mandela: Long Walk to Freedom

MCQs (1 mark)

1. Mandela fought against:
 - (a) colonialism only
 - (b) apartheid
 - (c) poverty only
 - (d) illiteracy only
2. Inauguration day was:
 - (a) 10 May 1994
 - (b) 15 Aug 1947
 - (c) 26 Jan 1950
 - (d) 1 Jan 2000
3. According to Mandela, courage is:
 - (a) absence of fear
 - (b) triumph over fear
 - (c) running away
 - (d) anger
4. Two obligations every man has according to Mandela:
 - (a) to family and friends
 - (b) to people and country
 - (c) to boss and school
 - (d) to church only
5. Freedom for Mandela means:
 - (a) wealth
 - (b) dignity and equality
 - (c) power only
 - (d) travel

VSA (1 mark)

6. What does 'apartheid' mean?
7. Who accompanied Mandela during inauguration?
8. What twin obligations does Mandela mention?
9. Why was 10 May 'lovely autumn day'?
10. Meaning of 'political defiance'.

SA (2 marks)

11. Describe inauguration ceremony at Union Buildings.
12. What did Mandela learn about brave men in prison?
13. Explain meaning of 'hunger for freedom' in author's life.

LA (3–4 marks)

14. **[4]** Describe Mandela's journey from prisoner to first black President. What values do you learn?
15. **[3]** "Freedom is indivisible." Explain with reference to the chapter.

Chapter 3: Two Stories about Flying

MCQs (1 mark)

1. Young seagull afraid of:

- (a) swimming
- (b) flying
- (c) eating
- (d) sleeping

2. Young seagull's mother tricked him with:

- (a) fish
- (b) worm
- (c) bread
- (d) fruit

3. Black Aeroplane pilot lost way due to:

- (a) engine failure
- (b) storm clouds
- (c) birds
- (d) fog only

4. Mysterious aeroplane had number:

- (a) Dakota DS 888
- (b) no number visible
- (c) ABC 123
- (d) Indian 001

5. Theme of His First Flight:

- (a) fear and confidence
- (b) war
- (c) farming
- (d) school life

VSA (1 mark)

- 6. Why did young seagull not fly with brothers and sister?
- 7. What happened when seagull dived at fish?
- 8. Where was pilot flying to in Black Aeroplane?
- 9. Who helped the pilot in storm?
- 10. Meaning of 'ledge'.

SA (2 marks)

- 11. How did mother help young seagull to fly?
- 12. Describe pilot's experience inside black storm clouds.
- 13. What mystery remained after landing in Black Aeroplane?

LA (3–4 marks)

- 14. **[4]** Describe how the young seagull overcame fear and flew for the first time.
- 15. **[3]** Compare themes of courage and trust in both stories of the chapter.

TELUGU (10th Class — Chapters 1, 2 & 3)

Chapter 1: వ్యాకరణ — ధ్వనులు, లేఖలు, పద-parchedalu

MCQs (1 mark)

1. 'అ' అక్షరం ఏ వర్గానికి చెందినది?
(ఎ) అ
(బి) క
(సి) ట
(డి) ప
2. 'స్వరం' అంటే:
(ఎ) బిగ్గరగా మాట్లాడటం
(బి) అచ్చు Telugu vowel sound
(సి) vargiyam
(డి) halant
3. 'అమ్మ' పదంలో 'మ' ధ్వని:
(ఎ) అంతస్థ
(బి) ఊర్ణ
(సి) sparsa
(డి) dravam
4. లేఖ 'ఖ'కు సంబంధించిన varnam:
(ఎ) క
(బి) ఖ
(సి) గ
(డి) ఘ
5. 'అ + ఆ = ?' (sandhi):
(ఎ) ఓ
(బి) ఆ
(సి) అఆ
(డి) అ

VSA (1 mark)

6. అచ్చులు ఎన్ని? పేర్లు రాయండి.
7. 'అనుస్వారం' అంటే emiti? ఉదాహరణ ఇవ్వండి.
8. 'అ + ఉ' sandhi ఫలితం రాయండి.
9. హాలంట్ మార్కర్ (̣) yokka upayogam cheppandi.
10. 'వ్యంజనం' ki oka udaharanam ivvandi.

SA (2 marks)

11. అ, ఆ, ఇ, ఈ, ఊ, ఋ, ఎ, ఏ, ఐ, ఒ, ఓ, ఔ — vargikaranam tho patu vivarinchandi.
12. 'తెలుగు' padam lo unna dhvanulanni vibhajinchandi (svara/vyanjana).
13. Dirgha sandhi mariyu Hrasva sandhi madhya teda cheppandi — 2 udaharanalu.

LA (3–4 marks)

14. [4] Sandhi alankaram gurinchi vivarinchi, oka chinn story nundi 5 sandhi udaharanalu rasi vivarinchandi.
15. [3] 'Telugu lipi' yokka charitra mariyu daani pradhana lakshanalu raiyandi.

Chapter 2: కవితా — 'మా Telugu Talli' / 'జాతిya Geetam' (Poetry)

MCQs (1 mark)

1. జాతీయ గీతam రాసిన vaaru:
(ఎ) గిడుగు వెంకట Ramamurthy
(బి) శ్రీ Sri
(సి) వేమనana
(డి) పోతనana
2. 'Telugu Talli' kavithalo pradhana bhavam:
(ఎ) kopam
(బి) mata prema
(సి) bhayam
(డి) viharam
3. 'Alankaram' ardham:
(ఎ) grammar rule
(బి) shabda/shaurya alankaram
(సి) number
(డి) sandhi
4. Upama alankaram example:
(ఎ) simile — 'face like moon'
(బి) only verb
(సి) punctuation
(డి) sandhi
5. Chandassu madhye 'maatradu' ante:
(ఎ) letter count in meter
(బి) page number
(సి) chapter name
(డి) author name

VSA (1 mark)

6. 'Upama' alankaram ki oka udaharanam.
7. 'Rupaka' alankaram emiti?
8. Kavitha lo 'bhavam' ante emiti?
9. 'Telugu Talli' lo kavi enti korutunnadu?
10. Padya chandassu peru cheppandi (udaharanam: Kandam).

SA (2 marks)

11. 'Jatiya Geetam' lo desha bhakti bhavalu raiyandi.
12. Oka padya padyam nundi 2 alankaramlu gurtinchandi mariyu vivarinchandi.
13. Kavi jeevita samacharam (2 lines) mariyu prasiddha kruthi peru.

LA (3–4 marks)

14. [4] 'Telugu Talli' kavithani padya bhagam (4 lines) gurthucheesi, bhavam, alankaram, prathana padalu vivarinchandi.
15. [3] Desha bhakti kavithala pai oka samiksha (150 words).

Chapter 3: గద్యా — 'Vidyarthi Jeevitam' / 'Maata Bhasha Gurutvam' (Prose)

MCQs (1 mark)

1. Gadya bhagam pradhana uddeshyam:

- (అ) vidya gurinchi
- (ఙ) cricket
- (ఞ) cinema
- (క్ష) politics only

2. 'Anuvada' ardham:

- (అ) translation
- (ఙ) addition
- (ఞ) division
- (క్ష) painting

3. 'Samiksha' ante:

- (అ) review/critical appreciation
- (ఙ) copy
- (ఞ) exam hall
- (క్ష) dictionary

4. 'Pada parichayam' lo emiti chestam:

- (అ) word meanings
- (ఙ) only drawing
- (ఞ) singing
- (క్ష) sports

5. 'Nipuna' pada ardham:

- (అ) expert
- (ఙ) lazy
- (ఞ) angry
- (క్ష) sad

VSA (1 mark)

6. 'Vidya' yokka upayogam — oka vakyam.
